Cum Ucide Pilula - Contraceptia hormonala Ucide - How The Pill Kills - Hormonal contraception Kills

{youtube}n1f3qTt1YDk{/youtube}

Dr. Angela Lanfranchi este un chirurg de san si profesor asistent de chirurgie clinica la Facultatea de Medicina Robert Wood Johnson .

Dr. Lanfranchi este director la Institutului de Prevenire a Cancerului de San.

Ea ofera o prezentare completa a **dovezilor stiintifice** a modului in care **pilula de control al nasterii, pilula contraceptiva, pilula anticonceptionala (contraceptive hormonale) ucide, pilula ucide femei si copii, precum si modul în care face acest lucru**
.

In 2005, Organizatia Mondiala a Sanatatii (OMS) lista pilula (contraceptivele orale estrogen-progesteron), ca Grup 1 cauzatoare de cancer agent care creste riscul pentru cancerul de san, ficat, si cancer de col uterin (cervix)
.

Cum UCIDE PILULA

Patru mecanisme majore

- **Pilulele provoaca coagularea sangelui**
- **Pilulele provoaca cancer**
- **Pilulele induc mai usor potentiale infectii letale**
- **Pilulele induc o mai mare probabilitate de a muri de o moarte violenta**

Dr. Angela Lanfranchi is a breast surgeon and clinical assistant professor of surgery at Robert Wood Johnson Medical School .

Dr Lanfranchi heads up the Breast Cancer Prevention Institute.

She gives a riveting presentation of the **scientific proof** of how **the birth control pill (hormonal contraception) kills, the pill kills women and babies, and how it does so** .

In 2005, the World Health Organization (WHO) listed the pill (estrogen-progestogen oral contraceptives) as a Group 1 cancer-causing agent that raises risk for breast, liver, and cervical cancers .

How the PILL KILLS

The Four Major Mechanisms

- **They cause your blood to clot**
- **They cause cancer**
- **They make it easier to get potentially lethal infections**
- **They make it more likely you will die a violent death**

Pilula contraceptiva, anticonceptionala - Cum functioneaza pilula contraceptiva, anticonceptionala, efectele ei avortive si problemele in ce priveste neinformarea corecta.
The Birth Control Pill - How the Pill works, its potential abortifacient affects and issues relating to informed consent.

{youtube}rvWFJ7ExbTY{/youtube}

Acest documentar arata **cat de multi oameni sunt neinformati despre cum functioneaza Pilula contraceptiva, anticonceptionala**, **efectele ei avortive (abortive) si problemele in ce priveste neinformarea corecta.**

The documentary highlights **how many people are uninformed about how the Pill works, its potential abortifacient affects and issues relating to informed consent.**

---

An idea whose time has come

In June 2004, American Life League Associate group Pro-Life Wisconsin sponsored the first known public vigil denouncing the Griswold decision. June 7 marks the 10th anniversary of Pro-Life Wisconsin's annual Griswold vigils that are held in many locations across Wisconsin.

Inspired by Pro-Life Wisconsin, in 2008 American Life League and STOPP (Stop Planned Parenthood International) launched the first nationwide "The Pill Kills Day," with grassroots activists bringing the truth about the pill to Americans across the nation. The Pill Kills has educated thousands and gained national media attention in recent years. MSNBC's Rachel Maddow vehemently attacked the campaign on multiple occasions, while talk show host Ricki Lake expressed her agreement with The Pill Kills via

Twitter saying, "We've seen too many deaths from birth control pills."

The pill's legacy: Sickness, cancer, blood clots, death

The pill is packaged and sold as a panacea for the world's problems and as a ticket to freedom for women. In reality, the birth control pill and other contraceptives are making women sick,

disabling them, and even killing them.

In 2005, the World Health Organization listed the pill (estrogen-progestogen oral contraceptives) as a Group 1 cancer-causing agent that raises risk for breast, liver, and cervical cancers.

Lawsuits against contraceptive manufacturers continue to mount, and millions of dollars are being awarded to victims—mostly because of blood clots that cause strokes, heart attacks, and death.

New research and headlines continue to confirm that the pill kills. Young women schooled in the idea that contraception should be used to prevent pregnancy at all cost learn to think of babies as the enemy that will destroy their lives, then default to abortion when they find they are pregnant.

That fear of children that results from the contraceptive mentality, coupled with the abortifacient nature of the pill, is depopulating and destroying our society one child at a time.

Sa nu ucizi ! - porunca a sasea

Ceea ce nu ti-a spus nimeni, poate, pana acum: avortul inseamna uciderea unui OM.

Un fetus (Fat inseamna Tanar) are inca din prima saptamana toate caracteristicile viitoarei persoane care se va naste. Oamenii de stiinta si medicii au cazut de acord asupra faptului ca viata incepe deja din momentul conceptiei.

Daca esti insarcinata si iei in considerare efectuarea unui avort, gandeste-te bine: avortul inseamna moartea unui copil viu, real, unic, exact asa cum esti tu.

Vrei sa-ti omori bebelusul? Uita-te la primul copil de pe strada: ai putea sa il ucizi? Exact acelasi lucru face un avort, dar cu un copil de dimensiuni mult mai mici.

Nu te lasa mintita: avortul = pruncucidere = infanticid !

Daca doresti un test de sarcina gratuit, sprijin, consiliere si ajutor poti suna sau trimite sms la 0756 150 645 si te poti programa. Poti trimite un email pe nuavortarad@yahoo.com si poti intra pe AdevarulDespreAvort.ro.

Alege Viata! Nu iti ucide bebelusul !

THIS TIME FOR KEEPS - Clip anti avort - Alege Viata - subtitrare in romana

{youtube}-W3sdHnNF8Y{/youtube}

Former “Kansas” Lead Singer and Grammy-winning Artist John Elefante has partnered with Online for Life to launch the music video for "This Time" – a powerful song that tells the story of John’s adopted daughter’s birth mother choosing life 20 years ago for Sami. The song’s lyrics are based on the true story of Sami’s 13-year old birth mother's experience as she battled thoughts of abortion.

Stories like Sami's is why Online for Life exists. OFL (www.OnlineForLife.org) works online and offline to reach abortion-determined women and men. We come alongside them in their time of crisis and connect them with local life-affirming organizations, mobile ultrasound units, or a call center where they can receive compassion, thoughtfulness, and helpful information...The kind of compassion and care that SAVES lives.

Enter your email address above to join our combined efforts in the fight for LIFE! Together, we can make sure every child makes their mark.

Mai bine prea tarziu decat niciodata - film rusesc Prozrenie (Iluminarea) - Clip anti avort - Alege Viata

{youtube}Nt6U41E09tc{/youtube}

Filmul "Mai bine prea tarziu decat niciodata" (in traducere directa din rusa: Prozrenie - Iluminarea) ne prezinta o poveste impresionanta si trista despre o femeie ce face un avort pentru a nu renunta la cariera de actrita. Suferind si regretand, insa, cele intamplate, ea face un gest cu totul neasteptat.
